Vibro-Meter® CE680, CE110I and PV102 vibration sensors

Dear Customer,

We are contacting you further to your past purchase of CE680, CE110I or PV102 IEPE vibration sensors from Meggitt's Vibro-Meter® product line. While we trust that these products have served you well, Meggitt is committed to offering our customers the best possible measurement and monitoring solutions, to help you to get the most from your machinery. This naturally involves updating and replacing items in our product range.

Accordingly, this letter is to inform you about the replacement of the CE680, CE110I and PV102 by our new range of CE6xx and PV6xx general-purpose vibration sensors.

The CE680 is replaced by the CE620 and the affected part numbers are:

- 444-680-000-511 replaced by 444-620-000-011-A1-B100
- 444-680-000-611 replaced by 444-620-000-011-A1-B100

The CE110I is also replaced by the CE620 and the affected part number is:

- VMD CE110 I replaced by 444-620-000-011-A2-B100

The PV102 is replaced by the PV660 and the affected part numbers are:

- 440-102-000-011 replaced by 440-660-000-011-A1
- 440-102-000-111 replaced by 440-660-000-011-A2 (Ex certification pending)

As part of our complete solutions for vibration sensing and monitoring, the new CE6xx and PV6xx product offering consists of a wider range of accelerometers and velocity sensors, including equivalent replacements for legacy CE680, CE110I and PV102 products, that will be used for all future applications.

After the stock of existing CE680, CE110I and PV102 sensors runs out, new CE6xx and PV6xx sensors will automatically be confirmed for all deliveries. This transition is expected in Q1, 2019. Please do not hesitate to contact your Meggitt representative, who will help you with any further questions you may have.

Yours faithfully,

Frédéric Micco
