vibro-meter® ABA17x explosive environment A2 configuration change

Dear Valued Customer,

With this letter we would like to announce that the explosive certified version of the industrial housing ABA17x product family (with configuration option A2) will now be NEMA 4X compliant. The housing body and door is now made in stainless steel 316L to comply with this standard. This change only applies to the explosive version, the standard version remains unchanged and is compliant to NEMA 4, 12 and 13 and is made of mild steel with a protective coating (painted).

This change was requested by some of our customers and will be applied from February 2025 to any new orders and future deliveries of ABA17x industrial housings. The pricing for the A2 explosive version will be updated accordingly.

The affected products and part numbers are:

- ABA171, PNR 830-171-000-011
- ABA172, PNR 830-172-000-011
- ABA173, PNR 830-173-000-011

Please do not hesitate to contact your Parker-Meggitt representative, who will help with any further questions you may have.

Yours sincerely

Michaël Hafner
