

Parker Meggitt
Motion, Power & Sensing Division

TO: All vibro-meter channel partners, Parker Meggitt

DATE: Villars-sur-Glâne, 18th November 2024

Discontinuation of CA101.

Dear Valued Channel partners,

As part of our ongoing efforts to align with our strategic vision and enhance our core offerings, we (Meggitt SA) have conducted a review of our product portfolio within the energy business sector. This evaluation has led us to refine our focus towards areas where we can deliver the most value and innovation to our customers.

Considering this new strategic focus, **we have made the decision to fully discontinue PNR 144-101-000-931.**

Due to nature and significant complexity of this product together with other challenges that prevent this product from manufacturing, there will be no last time buy opportunity.

As we move forward with this strategic realignment, we are confident that focusing on our core offerings will not only streamline our product portfolio but also strengthen our market position, enabling us to provide even more value to our customers and partners.

Should you need additional information, please do not hesitate to contact the undersigned.

Sincerely,

Salvatore Valenza
Sales Manager, EMEA
