**Meggitt Energy Sensing & Controls: new price list Meggitt GmbH products**

**vibro-meter® CE620, PV660 and PV685 sensors as a replacement of CE110I, CV160 and CI185**

Dear Customer,

We are contacting you further to your past purchase of CE110I, CV160 and CI185 vibration sensors from Meggitt's GmbH vibro-meter® product line. While we trust that these products have served you well, Meggitt is committed to offering our customers the best possible measurement and monitoring solutions in order to help get the most from your machinery. This naturally involves updating and replacing items in our product range.

Accordingly, this letter is to inform you about the replacement of the current versions of these vibration sensors. Following extensive tests carried out by our Engineering team, we can guarantee that the new versions of the CE620, PV660, PV685 are form, fit and functionally equivalent replacements.

The affected part numbers (PNRs) are:

Old Product	Previous version (PNR)	New Product	Replaced by (PNR)
<b>CE110 sensor</b>	VMD-CE110-X1-X2-VO-S	<b>CE620</b>	444-620-000- x11 + codes
<b>CI185 sensor</b>	VMD-CI185-X1-X2-CA-S	<b>PV 685</b>	440-685-000- x11 + codes
<b>CV160 velocity sensor</b>	VMD-CV160-4-CT-S	<b>PV 660</b>	440-660-000-11x + codes

The CE620 and PV685 are available as a sensor only (PNR 44x-6xx-000-111) or with a 5 or 10 m integral cable (PNR 44x-6xx-000-211). The PV660 is available as a sensor only, cable assembly (EC cables) must be ordered separately. For more information, please refer to the new sensors data sheet available in our Energy products catalogue

The new sensors have become our standard for all applications and must be offered in replacement of the previous versions. After the stock of the existing versions runs out, the new CE620, PV660 and PV685 will automatically be confirmed for all new deliveries.

Please do not hesitate to contact your Meggitt representative, who will help you with any further questions you may have.

Yours faithfully,
