

# SMART MONITORING SOLUTIONS FOR THE POWER GENERATION INDUSTRY

TRUSTED BY THE WORLD'S LEADING OEMs

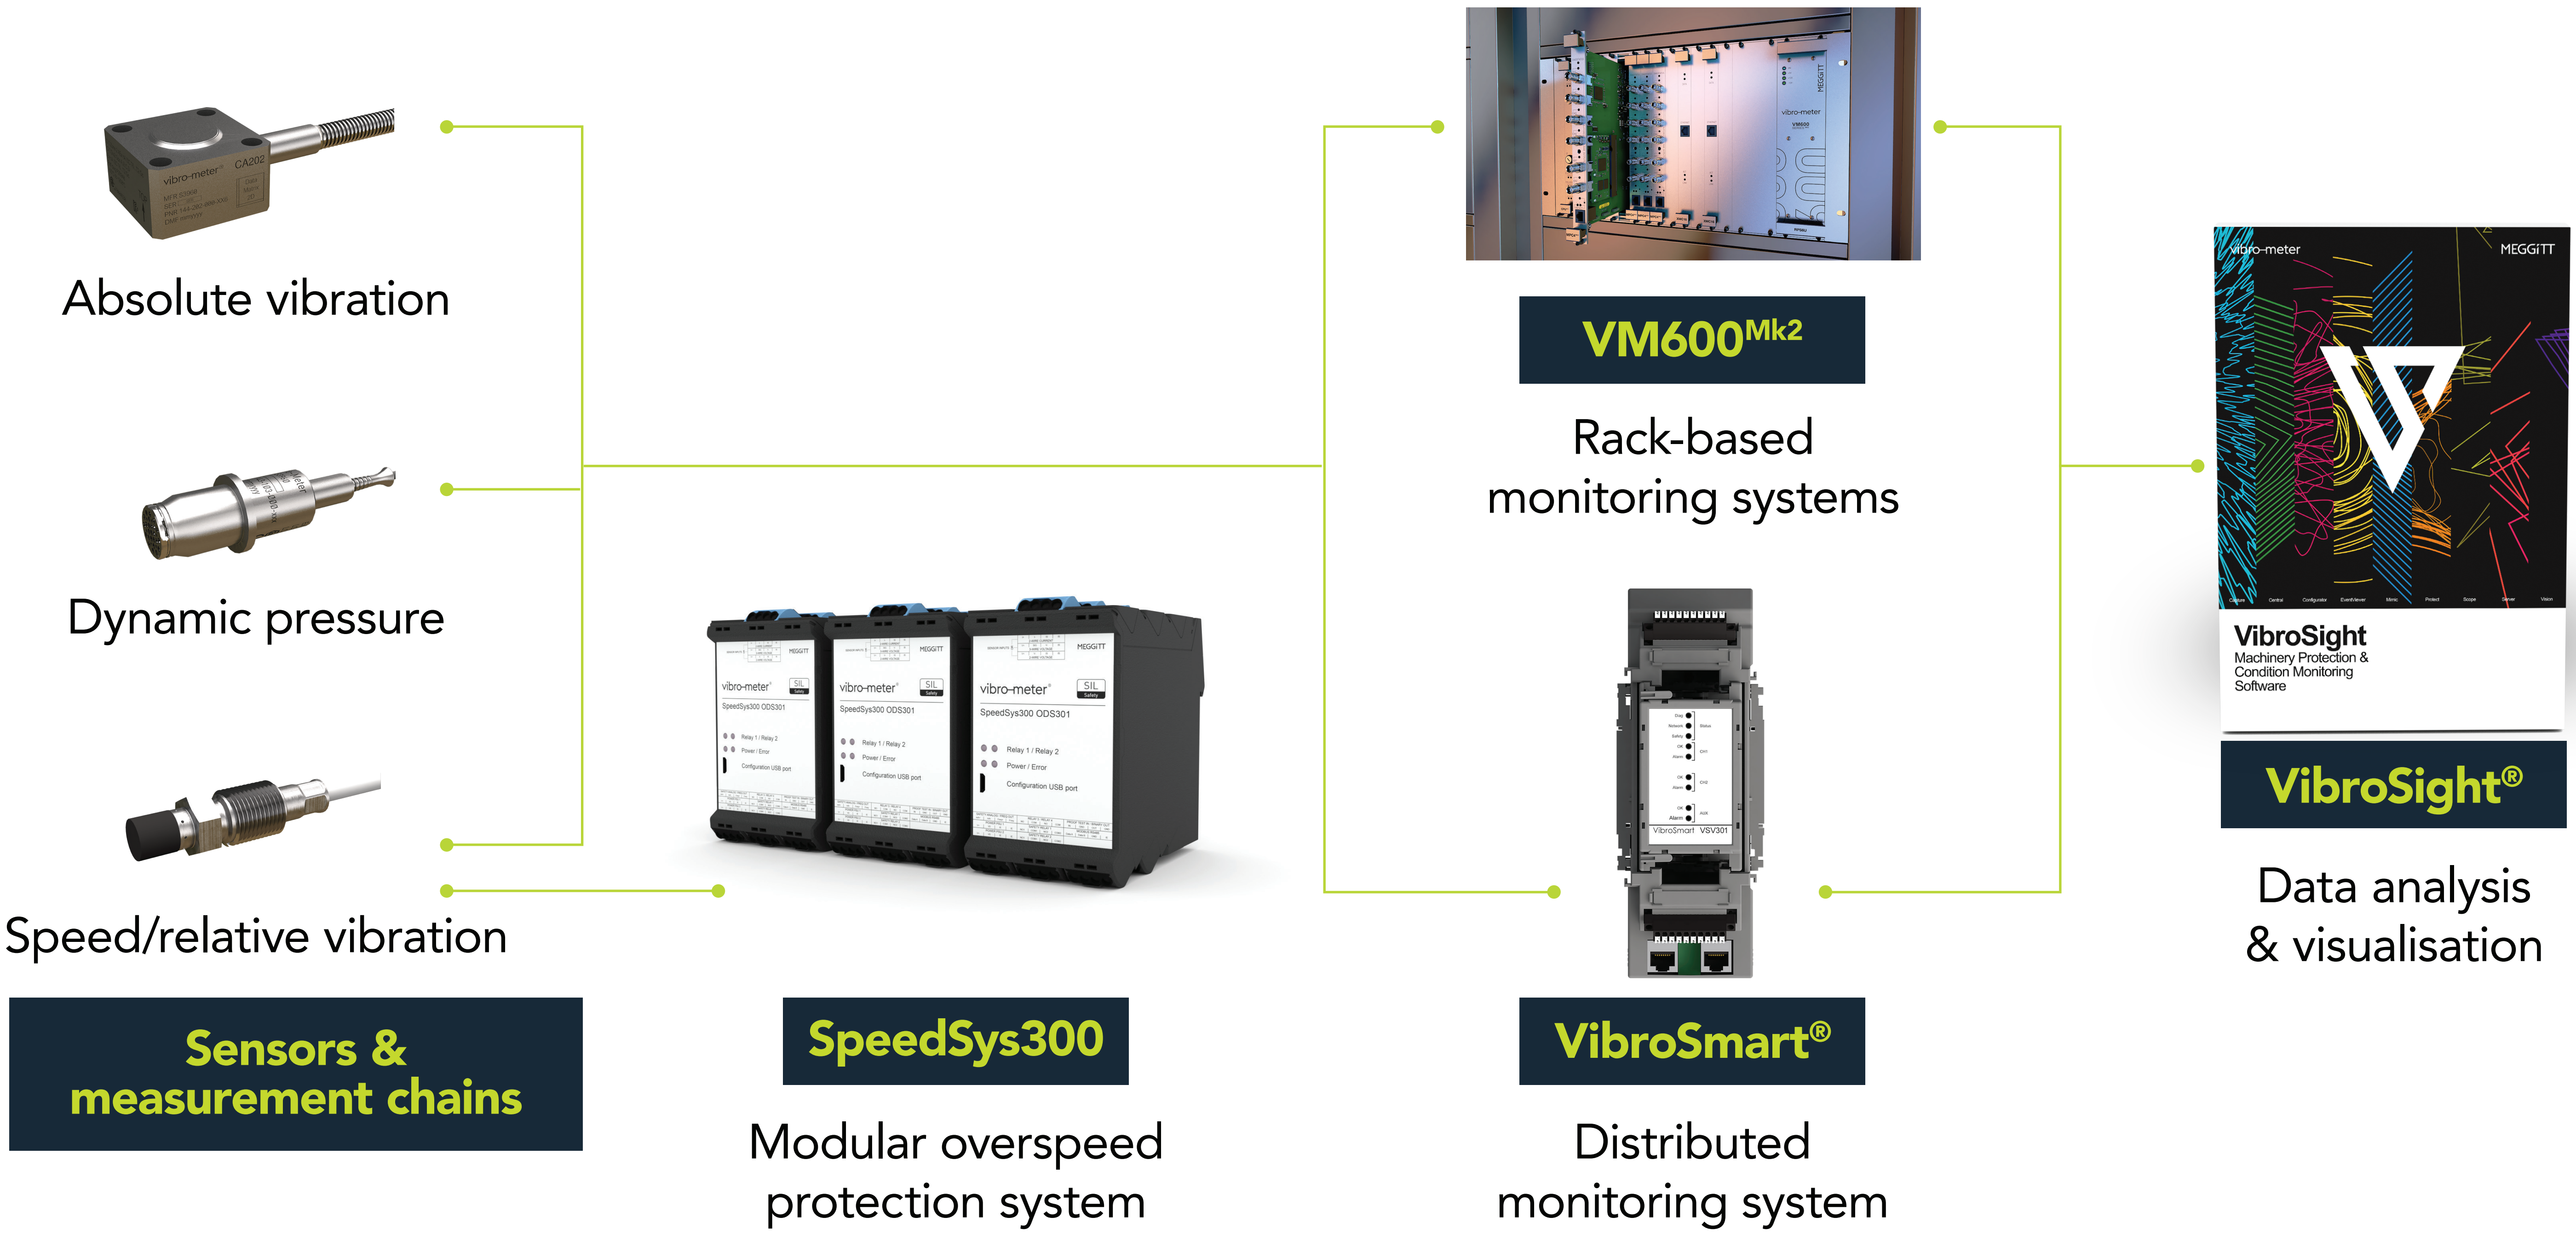

## SENSORS TO PROTECT & MONITOR YOUR MACHINES

- A** ABSOLUTE VIBRATION
- P** LUBE OIL PRESSURE
- T** LUBE OIL TEMPERATURE
- DP** DYNAMIC PRESSURE
- X, Y** SHAFT RELATIVE VIBRATION
- Z** THRUST/AXIAL POSITION
- S** SPEED/PHASE REFERENCE
- THRUST BEARING**

Although the Meggitt vibro-meter product portfolio does not include oil pressure or oil temperature sensors, our monitoring systems can interface with most sensors and/or import data from third-party systems.

## HIGHLIGHTS

- Over **70+ years** of domain expertise
- More than **10,000 rack-based** machinery protection and condition monitoring systems and over **100,000 TQ-based proximity sensors** installed worldwide. Also includes a track record of installing number of modular combustion monitoring systems
- Reliable protection of critical equipment in accordance with **API 670 5th edition**
- SIL rated** systems that comply with **IEC 61508** standards
- Cybersecurity** as per **IEC 62443** standards
- Our sensors are designed to operate in **extreme environments** with greater reliability for long term applications
- Custom built and turnkey solutions** including cabinets and portable systems

## Other monitoring applications:

Steam turbine

Balance of Plant (BoP)
